Good Morning Jennifer -

One item to share with residents and the Town Board at your July meeting is with regard to the result notification letters that JCI/Tyco provides to residents following testing of private wells.

- JCI/Tyco recently modified the results summary tables that accompany these letters to include the U.S. EPA's recent [Maximum Contaminant Levels \(MCLs\) for six PFAS](#).
- These U.S. EPA MCLs are a point of comparison to help people evaluate the testing results from their individual well.
- The DNR has requested that JCI/Tyco correct and clarify how the U.S. EPA MCLs are listed in these tables.
- JCI/Tyco is in the process of making these corrections, which are anticipated be included in future notification letters.
- Some of notifications letters that go out during this transition may not include the requested corrections.
- The DNR is always happy to answer questions, should residents have any on their testing results.

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.
