Johnson Controls
Katie McGinty
VP & Chief Sustainability, Government & Regulatory Affairs Officer
607 14th Street, NW, Suite 550
Washington, DC 20005

Katie,
On behalf of the Town of Peshtigo Board of Supervisors we invite you join us for an in-person meeting to discuss Johnson Controls current position regarding your permanent safe water solution to the Town of Peshtigo as a result of the PFAS contamination caused by JCI.

For the past several years, supported by press releases, public statements and legal documents, it has been the impression of both the Town and the public that JCI had acquired a high degree of confidence in its ability to secure water from the City of Marinette to meet that commitment. In light of the July 6th Resolution passed by the City of Marinette, which clearly states that they do not intend to provide water to the Town of Peshtigo via the extension of municipal water lines nor provide it in bulk, we welcome a discussion as to what your perceived next best solution is.

As it remains our highest priority, Town leadership continues to give considerable attention to this matter, therefore we welcome an open discussion aimed at proceeding as effectively as possible. While the Summit logistics are being finalized, we believe it of value to begin direct conversations with you in determining what our shared next steps will be, such as securing a current reimbursement agreement.

I look forward to hearing back from you with dates and times, over the next 3-4 weeks, which will work for you to secure a meeting.

Regards,

Cindy Boyle
Town of Peshtigo Chairperson
